Mowing Regime for Millennium Field (see attached plan)

(Please note: Plan is not to scale and central island bed shapes may not be exactly as on the plan)

White areas to be cut on the same frequency as the playing field (approx. every 2 to 3 weeks in the mowing season). This usually works out at 12 to 15 cuts

Shaded Green areas – the ‘bank’ by the amphitheatre benched area and area by the stream adjacent to this benched area to be strimmed/scythed 6 times per year

Grass to perimeters (by hedge along High Street and by trees 1 to 9, areas with trees 13,14,15,16) – cutting regime will be dependent on seasons but maximum of 3 cuts – usually late June/early July, then late August/September with final cut before winter. (Strimmed/scythed)

Central island beds – scythed/strimmed with grass to be raked up late July/early August plus final tidy before winter.

Grass along hedge (neighbouring Prospect House) late August strim/scythe.

Prepared by Cllr. Beckett

Delegated Member to Manage: - The Millennium Fields/The Planting
